# Walk Your Way to Better Health

A walk is not just good for your body, it's also good for your soul. Physical activity, like walking, is one of the best ways to reduce stress and boost your mood. However, reports show walking rates are declining steadily in the United States.

On average, 1 out of every 4 U.S. adults sits for longer than eight hours each day, per research from the Centers of Disease Control and Prevention, which can have negative consequences on physical and mental health. Regular exercise improves mood, boosts energy and can even help you sleep better. Staying active is one of the best ways to keep your mind and body healthy.

Consider this advice from the American Heart Association, which has worked for decades to promote policies and strategies that make it easier for communities to get and stay active. One example is National Walking Day, established by the organization to encourage people to move more throughout the day so they can feel, think, sleep and live better.

Indeed, adding more movement can benefit your body and mind in numerous ways, such as:

**Lowering disease risk.** Getting the recommended amount of physical activity (at least 150 minutes of moderate, 75 minutes of vigorous or a combination of those activities per week) is linked to lower risk of diseases, stronger bones and muscles, improved mental health and cognitive function and lower risk of depression, according to the U.S Department of Health and Human Services.

**Increasing sunlight exposure.** Outdoor exercise is an easy way to get moving and take in the sunlight, which can improve mood, boost immunity and help you get some vitamin D. Spending time outdoors is a no-cost option and has been shown to reduce stress, promote a sense of belonging and improve mood.

**Improving cognitive and mental function.** Physical activity keeps your mind sharp now and later. Studies show higher fitness levels are linked to better attention, learning, working memory and problem solving. What's more, a study published in the "British Journal of Sports Medicine" shows people who get the recommended amount of physical activity are less likely to develop depression.

**Living longer.** Healthy life expectancy can be positively impacted by increasing activity. According to research published in the "American Journal of Epidemiology," swapping just 30 minutes of sitting with low-intensity physical activity reduced risk of death by 17%.

Get moving to reduce your stress and step into better health. Learn more at [heart.org/movemore](http://heart.org/movemore).

A little creativity can go a long way to make your walk more fun. You might think of walking as a solo activity, but a companion makes it even more enjoyable. Ask colleagues, friends or family to join you.

A walk is a perfect excuse to take a break from a long day at your desk. If you work remotely, take a conference call on the go or plan your walk as a reward for completing a project.

Use your walk as a guilt-free opportunity to listen to a new audiobook or create a walking soundtrack of your favorite upbeat music.

Mix up your scenery. Taking new routes keeps your walks interesting and helps prevent boredom from traveling the same predictable path.

If you need an extra nudge to get moving, a pet may help you get fit. Dog parents are more likely to reach their fitness goals than those without canine companions. In fact, according to the "Journal of Physical Activity & Health," dog parents are 34% more likely to fit in 150 minutes of walking a week than non-dog owners. Pets can also help lower stress, blood pressure, cholesterol and blood sugar and boost your overall happiness and well-being.

Source: American Heart Association

# Horoscope

**ARIES** - Mar 21/Apr 20 Grit and guts will get you what you deserve this week, Aries. You may have an opportunity to make a good deal of money, so give this plan careful consideration. Ask for advice if the need arises.

**TAURUS** - Apr 21/May 21 Taurus, there has been change in your life and you may want to blame the stars. Things will move out of your comfort zone and you will have to sharpen your ability to adapt.

**GEMINI** - May 22/Jun 21 Gemini, you may be questioning the relationships in your life at the time being, but don't worry too much. If you hit a rough patch, things will clear up in a few days.

**CANCER** - Jun 22/Jul 22 A big shift in your perception and attitude will bring new components to your life that you may not have anticipated. This week you'll certainly have a few eyes-wide-open moments.

**LEO** - Jul 23/Aug 23 There will be no hiding out this week, Leo. You will soon learn that things will come your way at a rapid pace. Do your best to keep up, mighty Lion, as it's bound to be exciting.

**VIRGO** - Aug 24/Sept 22 Virgo, you might be willing to throw caution to the wind and get away on a moment's notice. There are affordable ways to do this if you are willing to do your homework.

**LIBRA** - Sept 23/Oct 23 Libra, even though some drama may be swirling in your universe, you find it tolerable because it's coming at you in small portions. Just stay on the sidelines as much as possible.

**SCORPIO** - Oct 24/Nov 22 Scorpio, if boredom has set in, it's better to look to new experiences instead of doing something rash just for the thrill. See which classes you can take or find new restaurants to explore.

**SAGITTARIUS** - Nov 23/Dec 21 Self-care and healing are what you should focus on right now, Sagittarius. You may have been pushing your needs to the side lately and you need to make this a priority.

**CAPRICORN** - Dec 22/Jan 20 You are not normally characterized as 'impulsive,' Capricorn. But you may surprise everyone this week. An opportunity to travel or another adventure could drop in your lap.

**AQUARIUS** - Jan 21/Feb 18 Try to create some tranquil spaces at home, Aquarius. You can use a haven, especially when a lot of stuff is thrown at you outside your home.

**PISCES** - Feb 19/Mar 20 Pisces, you may be on a mission this week to get things done. Don't rush in your efforts to complete everything or you are bound to make mistakes that are not easily fixed.

# Take On Spring Road Trips

5 tips to keep vehicles running smoothly

With the windows down and nothing but open road visible through the windshield, spring days often bring out the best driving conditions. When it's time to hit the pavement, make sure your ride is in tip-top shape following a winter of snow, salt and sand.

## Give a Thorough Clean

All that winter buildup can lead to grime both inside and outside your vehicle. A deep clean including the undercarriage, engine bay and obvious areas like doors and windows can help eliminate salt buildup. Give the interior a scrub as well to get rid of trash, dirt, debris and unnecessary items that may be weighing down your car and hurting its fuel efficiency. Plus, that clean look and smell can make road trips that much more enjoyable.

## Check (or Change) the Tires

Changing air temperatures can lead to fluctuations in tire pressure. As the weather warms, be sure to check tire pressure frequently to avoid overinflation that leads to wear. It's also an opportunity to check tread depth as it may be time for new tires altogether.

## Change the Oil

While most experts recommend oil changes every 5,000 miles or so, depending on the age of your vehicle, a spring auto

checklist isn't complete without checking (and possibly changing) the oil. Fresh oil keeps engines running as intended, and by changing oil in the spring, you can help ensure you're ready to hit the road for most – or all – of spring and summer.

## Test the Wiper Blades

In many parts of the country, spring means rain. Ensuring wiper blades are ready to take on weather ranging from sprinkles to downpours is practical for maximizing safety on the road. Cold weather and ice can cause cracking on worn out wipers, which makes spring a perfect time to assess winter's damage.

## Consider a Professional Inspection

If it's been a while since your vehicle was properly inspected, now may be a good time to have a professional take a look under the hood. Wiper blades and tire pressure are easy for many car owners to handle, but alignment, suspension, brakes and other key elements of vehicle safety and efficiency are often best left to those with trained eyes. Letting a certified mechanic assess your ride is a perfect way to ensure you're ready for the open road.

# Guess Who?

I am an actress born on April 4, 1979, in New York. I had a role on "Pee-wee's Playhouse" as a child. I gained additional acclaim in the "American Pie" movies and on "Orange Is the New Black." I am also the successful co-creator of a macabre TV series.

Answer: Natasha Lyonne

**Involve the Kids**  
Depending on their age, small children can absolutely steal the show on Mother's Day. They when it comes to giving memorable gifts. They have a unique way of seeing the world through their eyes, and their perspective can be a real treat for their loved ones. Involve them in the gift-giving and gift-making process. It's a great way to teach them about giving and to make sure they have a special memory of the day.
